**As the legal owner of the property listed on members and agents of the Agency to inspect to the permit.	this application, I hereby conse he subject land, at reasonable t	nt to the propossimes, during the	ed activities. And I hereby authorize the pendancy of the application and for the life of
Owners Printed Name:			

4.	Area of wetland to be disturbed: sq. ft. or ac				
	Area of watercourse to be disturbed: sq. ft. or ac				
	Upland review area to be disturbed: 960 sq. ft. or ac				
	Will fill be needed on site? Yes No				
	If yes, how much fill is needed? Cubic yards				
5.	The property contains (circle one or more)				
	WATERCOURSE WATERBODY WOODED-WETLAND SWAMP				
	FLOODPLAIN OTHER: LAKE				
	Description of soil types on site: Hinckley, gravelly sandy loan; Scarboro muck				
	Description of wetland vegetation: Reeds				
	Name of Soil Scientist(s) and date of survey:				
6.	Provide a written narrative of the purpose and a description of the proposed activity and proposed erosion and sedimentation controls and other best management practices and mitigation measures which may be considered as a condition of issuing a permit for the proposed regulated activity including, but not limited to, measures to (1) prevent or minimize pollution or other environmental damage, (2) maintain or enhance existing environmental quality, or (3) in the following order of priority: restore, enhance and create productive wetland or watercourse resources. Depending on the complexity of the project, include the following: construction schedule, sequence of operations, drainage computations with pre and post construction runoff quantities and runoff rates, plans clearly showing the drainage areas corresponding to the drainage computation, existing wetland inventory and functional assessment, so report, construction plans signed by a certified soils scientist, licensed surveyor, and licensed professional engineer.				
7.	Provide information of all alternatives considered. List all alternatives which would cause less or no environmental impact to wetlands or watercourses and state why the alternative as set forth in the application was chosen. All such alternatives shall be diagramed on a site plan or drawing. (Attach plans showing all alternates considered).				
8.	Attach a site plan showing the proposed activity and existing and proposed conditions in relation to wetlands and watercourses and identifying any further activities associated with, or reasonably related to, the proposed regulated activity which are made inevitable by the proposed regulated activity and which may have an impact on wetlands and watercourses.				
9.	Provide the name and mailing addresses of adjacent landowners (including across a street). Attach additional sheets if necessary.

NARRATIVE PAZZ & CONSTRUCTION 297 BOSTON POST ROAD

This is an application to maintain 2 connex boxes (steel boxes used to store equipment), as detailed on the site plan attached to this Application. These boxes are 12' x 40' and of steel construction, and will not require any excavation or disturbance of earth materials. The close proximity to the lake is approximately 132'. No other disturbance of the site is proposed.

1.10	Renewal of Previous Approval\$100.00	
1.11	Monitoring Compliance Fee \$100.00	

1.12 SCHEDULE A. For the purpose of calculating the permit application fee, the area in schedule A is the total area of wetlands and watercourses and the upland review area upon which a regulated activity is proposed.

SQUARE FEET of AREA

1.12.1. Less than 1,000	\$0.00
1.12.2. 1,000 to 5,000	\$250.00
1.12.3. More than 5,000	\$750.00

1.13 SCHEDULE B. For the purpose of calculating the map amendment petition fee, linear feet in schedule B is the total length of wetlands and watercourses boundary subject to the proposed boundary change.

LINEAR FEET

- 1.13.1. Less than 500.... \$0.00
- 1.13.2 500 to 1,000 \$250.00
- 1.13.3 More than 1,000......\$750.00

CH	ECKLIST FOR A COMPLETE APPLICATION
	completed application form including Department of Environmental Protection reporting form (green copy)
	A narrative of the purpose and description and methodology of all propose activities;
	Alternatives considered by the applicant, reasons for leaving less than a 10' buffer between clearing and the wetlands.
	Such alternatives to be diagrammed on a site plan or drawing and submitted to the commission as part of the application;
	Names and mailing addresses of abutting property owners;
	Three copies of approximately l"=40' scale plans
	Locations of existing and proposed land uses
	Locations of existing and proposed buildings
	Locations of existing and proposed subsurface sewage disposal systems, and test hole descriptions
	Existing and proposed topographical and man-made features including roads and driveways, on and adjacent to the site
	Location and diagrams of proposed erosion control structures
	Assessor map and lot number
	Key or inset map
	North arrow
	Flood zone classification and delineation
	Use of wetland and watercourse markers where appropriate.
	Soil types classification and boundary delineation (flagged and numbered boundary), Soil Scientist's original signature
_	and certification on plans
	Soil Scientist's (or other wetland scientist) report on the function of the wetlands
	Watercourse channel location and flow direction, where appropriate
	300 ft. regulated area depicted on plans
	Conservation easements where appropriate
	A detailed erosion and sediment control plan which meets requirements set forth in the most recent revision of the
_	Connecticut Guidelines for Soil Erosion and Sediment Control, published by the Connecticut Council on Soil and Water
	Conservation, including:
	Location of areas to be stripped of vegetation and other unprotected areas
0	Schedule of operations including starting and completion dates for major development phases
	Location and design of structural sediment control measures
	Timing of planned sediment control measures
	Use of wetland and watercourse markers
	Proper certification on the application documents and plans
T	the second of th
	the case of filling in wetlands, watercourses, or regulated upland areas, the following items are necessary:
	Area to be filled
_	Volume of requested fill
u	Finished slopes of filled areas
	Containment and stabilization measures
	Proposed finished contours
	Evaluation of the effect of filling the wetlands with respect to storage volume and its impact downstream showing before
	and after development flows, and the evaluation of storm water detention including the existing need for flood control
	downstream
Ot	her required items:
	Proof of adjoining Town notification, where required;
	All application fees required by Section 16 of these regulations;
	A written narrative detailing how the effects of the applicant's proposed activities upon wetlands and watercourses shall be
	mitigated.
	A written description of any and all future plans which may be linked to the activities proposed in the current application.
	Address the potential to enhance the current buffer area.
	Review drainage information with Town Engineering
	Mailing requirements for abutters (nublic hearing only)
