---

No need for extra time, I just wanted to ensure that the drainage was well thought out and not just assumed to work.

If Mr. May believes in his professional opinion that the increase in the CN is insignificant, and I also see they are directing one roof to the back and not into the collection system, I am good with that.

I think the plan clearly identifies the drainage sub-areas and should be clear to the commission where the water is going, which was the goal. Since the system was previously approved under similar conditions, this level of analysis, with consultation of PE Mr. May, should suffice.

If you need anything else from me prior to tomorrow night, please let me know.

Alex

Alex,

I just received this. Please see the attached and let me know if this can be reviewed before tomorrow night's meeting. Due to the timing, I suspect you will need more time.

Thanks,  
Gary
