

2005 Clark's we moved to Clark's Hollow.
At that time the town of East LYME asked that a retention pond be built.

This pond was connected to a large pipe running across route 161 to the property in question. The State and town approved this set up.

By building on this inlands property it will diminish it's capability to properly be a eco system.

We need to protect our wetlands and not permit building on land that is designated wetlands.
