He frequently conducts targeted surveys for sensitive, rare, and "listed" species (i.e. endangered, threatened, special concern), and aquatic biosurveys to assess the biodiversity and biotic health of ponds, lakes, vernal pools, rivers, and streams. Mr. Logan has extensive experience in performing herpetological surveys, including over 175 vernal pool investigations and evaluations.

Mr. Logan has participated in nearly 2,300 individual projects in New England and the Mid-Atlantic States and in 157 of 169 municipalities in Connecticut.
